Education

B.Tech in Computer Science (AI & ML) : CGPA - 8.32 2023 - 2027.
MAKAUT (Maulana Abdul Kalam Azad University of Technology), Kolkata, India
High School – Methodist High School : 92% Completed 2023

Technical Skills

Languages:	Python, Intermediate Java, HTML-CSS-JS, SQL, Bash.
Developer Tools:	Git & GitHub, Jupyter, MATLAB, Google Cloud Platform (GCP), MySQL, Apache, Bootstrap
Key GCP Services:	VM mapping, BigQuery, Cloud Functions, VertexAI workbench, CI/CD Pipelines.
AI/ML-Frameworks:	MERP(Full Stack), sci-kit learn, TensorFlow, OpenClaw, LangChain (basic).
Software Concepts:	API Development, CORS handling, RAG Pipelines, AI-Integration (Agentic), Software Development Life Cycle (SDLC), Version Control, Unit Testing, Object-Oriented Programming, Database Management System, Data Structures & Algorithms.
Spoken Languages:	**German** (CEFR A2) appearing for B1, **French** (CEFR A1), English (Full Proficiency).

Work Experience

Data Analyst Intern — Ozibook Fintech (Bengaluru) Apr 2024 – Jun 2026

- Worked Hands on the core Functional project of Analysis on the data of Personal Coaches, developed real solutions for increased redundancy tenures of clients.
- Developed internal Python-based applications to process and validate large-scale financial datasets for 3 clients, improving data accuracy by 38% and reducing manual processing and environment provisioning time for CI/CD.
- Engineered and maintained automated data pipelines using Python and Pandas, leading a team of 4 interns in the development and deployment process. *ICC & LOR*

Projects

FinPass AI-Powered Financial Planning & Investment Optimization Platform *GitHub Repo*

- Developed and deployed an AI-Assisted FullStack application with multiple RESTful APIs, FastAPI & Flask, MongoDB to deliver personalized onboarding, portfolio analytics, and investment guidance..
- Implemented CORS handling and cross-origin API communication between the frontend(Vercel) and the backend service hosted on Cloud Space (HuggingFace).
- Implemented secure authentication, RAG responses with conversation memory, and deployment-ready scalable for 1,000-run Monte Carlo goal simulations, and risk-based asset allocation to generate data-driven recommendations.

OfferBridges Credit card Marketplace for offers on E-Commerce *Github Repo*

- Engineered an automated offer-intelligence pipeline using **crawler**, Playwright/fetch-based extraction and AI-assisted discount evaluation. It processes Amazon, Flipkart, and Myntra product links, identifies eligible bank-card offers, calculates the best savings and Matches them to the desired card holders in real time.
- A Refactored platform architecture oriented on **Next.js** + **Node.js** to withstand the scrapping combining React 19 for the Frorntend and MongoDB, JWT/OAuth to support Database and 10000+ request robustness.

Research Publications

- Babul P. Tewari, **Umair Lari**, Poulomi Mukherjee, "An Edge-Native Machine Learning Framework for Proactive IoT Network Security", IEEE Madhya Pradesh Section Conference (MPCON 2026), 14^{th}-15^{th} March, 2026. *IEEE*
- **Umair Lari**, Poulomi Mukherjee, Babul P. Tewari,"Malware Detection in IoT : Machine Learning based Solution", In Book: Securing the Internet of Things: Machine Learning and Beyond, Springer, accepted and appear, 2026. *Profile*.

Certifications & Achievements

- **LeetCode :** 300+ submissions and top 15% in Biweekly Contests with 50 days & 100 days badges earned. *Profile*
- **Google Scholar :** Google, Feb 2024. *Profile*
- **Google Cloud Arcade Skill Badges :** Earned multiple badges by completing hands-on labs in cloud infrastructure and data engineering challenges, Dec 2023. *Public Profile*
- **Cybersecurity Foundation (Micro-degree) :** Coursera, Apr 2024. *Certificate*
